

## **Introduction to the Cambridge program**

The Cambridge program is designed for students aged 5-19 in 10,000 schools in 160 countries. The program has four main levels: Cambridge Primary, Cambridge Lower Secondary, Cambridge Upper Secondary (IGCSE), and Cambridge Advanced (AS & A). In addition, our school has been officially authorized to offer the IGCSE and AS & A level programs officially.

## **Features of the Cambridge program:**

- Suitable for students' age and mental characteristics /for students aged 5-19/.
- Teachers and students have the opportunity to improve their knowledge and upgrade their academic level continuously.
- It has a history of 150 years. It is implemented in 10,000 schools in 160 countries around the world.
- More than 1,500 universities worldwide, including Harvard, Oxford, Cambridge, and MIT, have recognized the Cambridge program, and students who complete the program are better prepared for the next level of schooling and life. /Cambridge International survey of admissions officers, 2018/

We started implementing the Cambridge Upper Secondary (IGCSE) program in the 9th-grade in the 2021-2022 academic year.

## **The Cambridge IGCSE program develops students' knowledge, understanding, and skills in the following areas: These include:**

- Master the content of the topic
- Apply knowledge and understanding to new and familiar situations
- Research
- Provide flexibility and quick adaptation to change
- Work and communicate in English
- Increased understanding of culture and the ability to respect the culture of others

:

## **Why did our school start the Cambridge IGCSE program?**

To fulfill our school's mission, we have applied for the international baccalaureate (IB) world school candidate in 2016. Since then, two cohorts have successfully achieved 100% of the bilingual diploma requirements, and the graduates of the program have enrolled in international and local universities with scholarships. Thus, to provide our students with more opportunities as early as possible, we are implementing the Cambridge IGCSE program in the 9th-grade starting from the 2021-2022 academic year.

## **Courses offered by our school under the Cambridge IGCSE program:**

- **Group I: Language**
  - English
  - Chinese
  - French

- **Group II: Humanities and Social Sciences**
  - Sociology
  - Geography
- **Group III: Science**
  - Chemistry
  - Biology
  - Physics
- **Group IV: Mathematics**
  - Mathematics
- **Group V: Professional and Creative**
  - Global perspective

**What are the benefits for our students by the end of the 12th-grade?**

By implementing a mixed program that is popular in Southeast Asia, our students will receive an internationally recognized education and will be able to compete globally. In addition to graduating with an international higher secondary diploma, a Mongolian secondary and higher secondary diploma, and an IB diploma, students will be able to have their Cambridge and IB diploma scores transferred to the IELTS.
